

What is our Acceptable Use Policy?

Please take time to read our *Acceptable Use Policy (AUP)*.

An AUP sets out expectations regarding your use of school IT. This includes how you use school equipment (hardware), software, the network.

It also includes how we expect all pupils to behave when using our IT systems.

Understanding what an AUP is and why it is important is also preparation for further study and work.

All sixth forms, colleges and universities have AUPs and virtually all employers will have some sort of AUP.

It is important that you always understand what is an AUP and how you need to use IT.
